

'RadAlert' Talking Sign System (TSS-KIDS)

Brand new for 2013, the RadAlert TSS is the first sign product to be designed specifically to promote good hand hygiene practice amongst children of pre-school age.

RadAlert TSS incorporates a motion sensor and is designed to provide voice messages in the washroom area of a nursery reminding children to wash their hands.

RadAlert can be programmed with the children's own messages by using any standard PC running Windows, without any specialist programming knowledge. RadAlert provides a fun, interactive method of teaching good hand hygiene practice by utilising the nursery peer group.

Product Features

- On sensing the presence of people, or from an external volt free contact, RadAlert TSS will play any pre-programmed voice files in any language.
- Time delays between messages are selectable via the remote programmer to ensure that the message is broadcast at the right time.
- Up to 100 messages can be pre-programmed and selected either individually or sequentially where each message in the list is played in turn on each activation , allowing every child to have their message played in rotation with others.
- RadAlert TSS contains a Windows® based file structure which allows simple 'drag and drop' file copying for ease of programming.
- New SmartWave® hi-resolution voice playback software produces crystal clear hi-fidelity audio files to be broadcast in any location.
- RadAlert TSS can be powered simply by 4 x AA alkaline batteries, or connected to the mains through a 6Vdc power supply unit for high traffic areas.
- Gel Speaker technology can be utilised to make any object produce sound, from glass, to plastics, to stainless steel. The choice is yours!

"Please wash your hands before leaving this area"
